Archipelago of Fire – Uprising in Indonesia

Posted on 2025/08/29 - 2025/08/29 by darknights

News from Indonesia. 25th August and continuing….

Angry youth uprising triggered by rising taxes for public and repressive military. There’s no organisation, the insurrection is being spearheaded by young anarchist, nihilists and uncontrollables. Many young anarchists from high school students association are arrested. The high schoolers are the energy. Around 400 of them were arrested on 25th August according to reports. Most of the action coordinated live on social media. Usually some liberal union or opposition party controls the narratives but not this time. Even mainstream media acknowledge that social media is the source of the documentation. Politicians cannot control the narratives any longer. It’s been a tradition for decades that executive student bodies normally are stewards for these kind of demos, but each year these brokers are getting outed. By the students themselves. That’s why NGOs, unions, “civil anarchists” and students associations of left and right hate the anti-organisational faction.

Fuck them all. We provoke the youngsters to act for themselves.Individuals are no longer spooked by ideological duty, norms and all those extrenal values…

Last night, 28th August, police killed one dead. Nationwide riot against the tax rise. In several cities the riot was organic and self-organised. The police public image continues to crumble, as the peoplke supports the rioters. Cells coordinated other things and most nihilist-insurrectionary announcement are quite dominating the narrative. Anonymous instagram social media accounts with thousands of followers

calling for anti-political insurgency. Everyday they make good calls and explanations.

The union brokers announced they would be on the streets and “there will be no riot”, but the youngsters and rioters mock them right away on social media. We give it up to the youngsters. we can only stimulate them to be more uncontrollable. At the night, the internet went to shit. While “civil anarchist” calling for people’s council we call for fuck everything. Only providing networking coordination and street action technical facts. We never really organise people.

Friday 29th August. Basically anarchists control the narrative. People responding to the nationwide call to attack the police station and the police themselves. Attack the government and the mass-media lost control of the information and news.

Our network keep calling for revenge since the police murder last night and its getting hotter. The cells are in the streets.

You can see the uprising on various news though all the good videos only on social medias.

From the Archipelago of Fire.

Jakarta Under Siege

August 25th, 2025. Jakarta no longer belongs to the rotten elites. Thousands from every corner of the land storm the capital. This is not just a protest- it’s a collective eruption of rage against rising housing taxes, endless corruption, and the military-police dogs of the state.

From dawn til midnight, the streets turn into a battlefield of defiance. Screams, fire and stones become the people’s language of fury.

This is not some puppet show of the elites- this is raw anger, untamed, leaderless and impossible to control.

Santiago, $hile: Agitation in memory of compañera anarchist Belén Navarrete
“This is beyond our prediction, usually during a demonstration, protesters only threw rocks or burn a tyre in front of the office. They never stormed into the building or burned it.”
